

Oxbow Seed Company

BRAND GUIDELINES EDITION ONE, AUTUMN PREPARED BY PELLAM STUDIO

01 LOGO

The bend in the river

An oxbow forms when a river cuts itself a new course and leaves a loop of rich silt behind. The mark is that loop, holding a seed.

Clear space: x equals the height of the seed.

02 COLOUR

Grown, not printed

Five colours, taken from a field at the end of a season. Husk and Field do most of the work; the others are used in small, deliberate amounts.

05 VOICE

Write like a neighbour with a good shed

WE ARE	WE WRITE	WE AVOID
Practical	Thin to 8 cm. It feels cruel. Do it anyway.	Ensure optimal plant spacing for best results.
Dry	Slugs adore this one. So will you.	A customer favourite you'll love!
Specific	Saved on the farm since 1974, from a single row behind the barn.	Heritage quality, passed down through generations.
Patient	Parsnips take their time. Three weeks is normal. Stop checking.	Fast results with our premium seed range.

BACK FLAP, AS PRINTED

Sow from April, once the soil stops sticking to your boots. Thin ruthlessly. Eat the thinnings.

Sowing depth 2 cm
Row spacing 30 cm
Days to harvest 60 to 70
